Your ideas on “assisted suicide”

Is it reasonable to practice assisted suicide? And why?

Wordle

Yes, I think it is reasonable to practice assisted suicide. There are three reasons. Firstly, as the video shows, it's the patient's own right death and choice. So we should respect the person if he really wants to. Some the person who wants to die may suffer a lot. Maybe he is a patient who is no longer assured any more, for him assisted suicide is a good choice. The assisted suicide is different from euthanasia. It's understood that the doctor prescribes a lethal dose of medicine, so the patient can die with dignity, and it also decreases lots of sadness from one's families.
