

# Contents

## Unit 1

Environmental science  
and engineering P1

## Unit 2

Air pollution P23

## Unit 3

Water pollution P43

## Unit 4

Soil pollution P63

## Unit 5

Solid waste and  
disposal P85

## Unit 6

Waste recycling P107

## Unit 7

Ecosystems P129

## Unit 8

Environmental  
protection P149

---

**Text A** Studying environmental science: definition,  
scope and importance P3

**Text B** What is environmental engineering and what do  
environmental engineers do? P18

---

**Text A** Air pollution: causes and solutions P25

**Text B** How air pollution works on different scales P38

---

**Text A** Water pollution: an introduction P45

**Text B** Solutions to water pollution P58

---

**Text A** What is soil pollution? P65

**Text B** Reducing soil pollution and erosion P80

---

**Text A** Solid waste disposal in the U.S. P87

**Text B** Better solid waste disposal P103

---

**Text A** Recycle more? Or...recycle better? P109

**Text B** Single stream recycling P125

---

**Text A** Major types of ecosystems P131

**Text B** What is ecology? P144

---

**Text A** Principles and approaches of environmental  
protection P151

**Text B** Environmental degradation: Causes and effects P166
