

# Contents

## Unit 1

Materials science and engineering P1

**Text A** An introduction to materials science P2

**Text B** Materials engineering and engineers P15

## Unit 2

The components of materials P19

**Text A** Graphene P20

**Text B** Main chemical components of wood P33

## Unit 3

The properties of materials P37

**Text A** Mechanical properties of materials P39

**Text B** Physical and chemical properties of materials P52

## Unit 4

The classification of materials P57

**Text A** The classification of materials P58

**Text B** Biomaterials P72

## Unit 5

The processing and molding of materials P77

**Text A** What makes biofuels? P78

**Text B** Industrial needs for polymer injection molding technology P91

## Unit 6

Biomimetics and materials P95

**Text A** Intelligent clothing P96

**Text B** What lessons can we learn from nature? P111

## Unit 7

The security of materials P115

**Text A** Nanoscale materials and EHS P117

**Text B** Safety of food contact materials P127

## Unit 8

Sustainable materials P131

**Text A** Timber as a sustainable material P132

**Text B** A sustainable home P142
